Hey Glenn. Big fan. Do you have a GPG key? If not, I can help you get set up with one. Doing what you do, you really should have encryption ability. But that's not what I'm writing about.

(and I go on to introduce a talented internet friend who needed a job at the time.)

4096-bit key available
on primary pgp key servers
for highest security,
check its fingerprint
on my website.

From Rolling Stone, Dec. 2013:

And so it was that on December 1st, 2012, Greenwald received a note from a person asking for his public encryption, or PGP, key so he could send him an e-mail securely. ... The dance went on for a month. Finally, after trying and failing to get Greenwald's attention, the source gave up.
